01 Who We Are

We are a multinational 3PL integrated logistics operator with our own technology, prepared to provide agile and efficient responses to the needs of each client.

We operate in the Iberian Peninsula, the Canary Islands and the Caribbean, and are part of the VASCO Group, which gives us strength, strategic vision and the ability to adapt quickly to an increasingly demanding market.

 **+250 vehicles**

 **100,000 m2 area**

 **Proprietary technology**

We have an infrastructure prepared to scale and adapt to growth, with total control and visibility over each project.

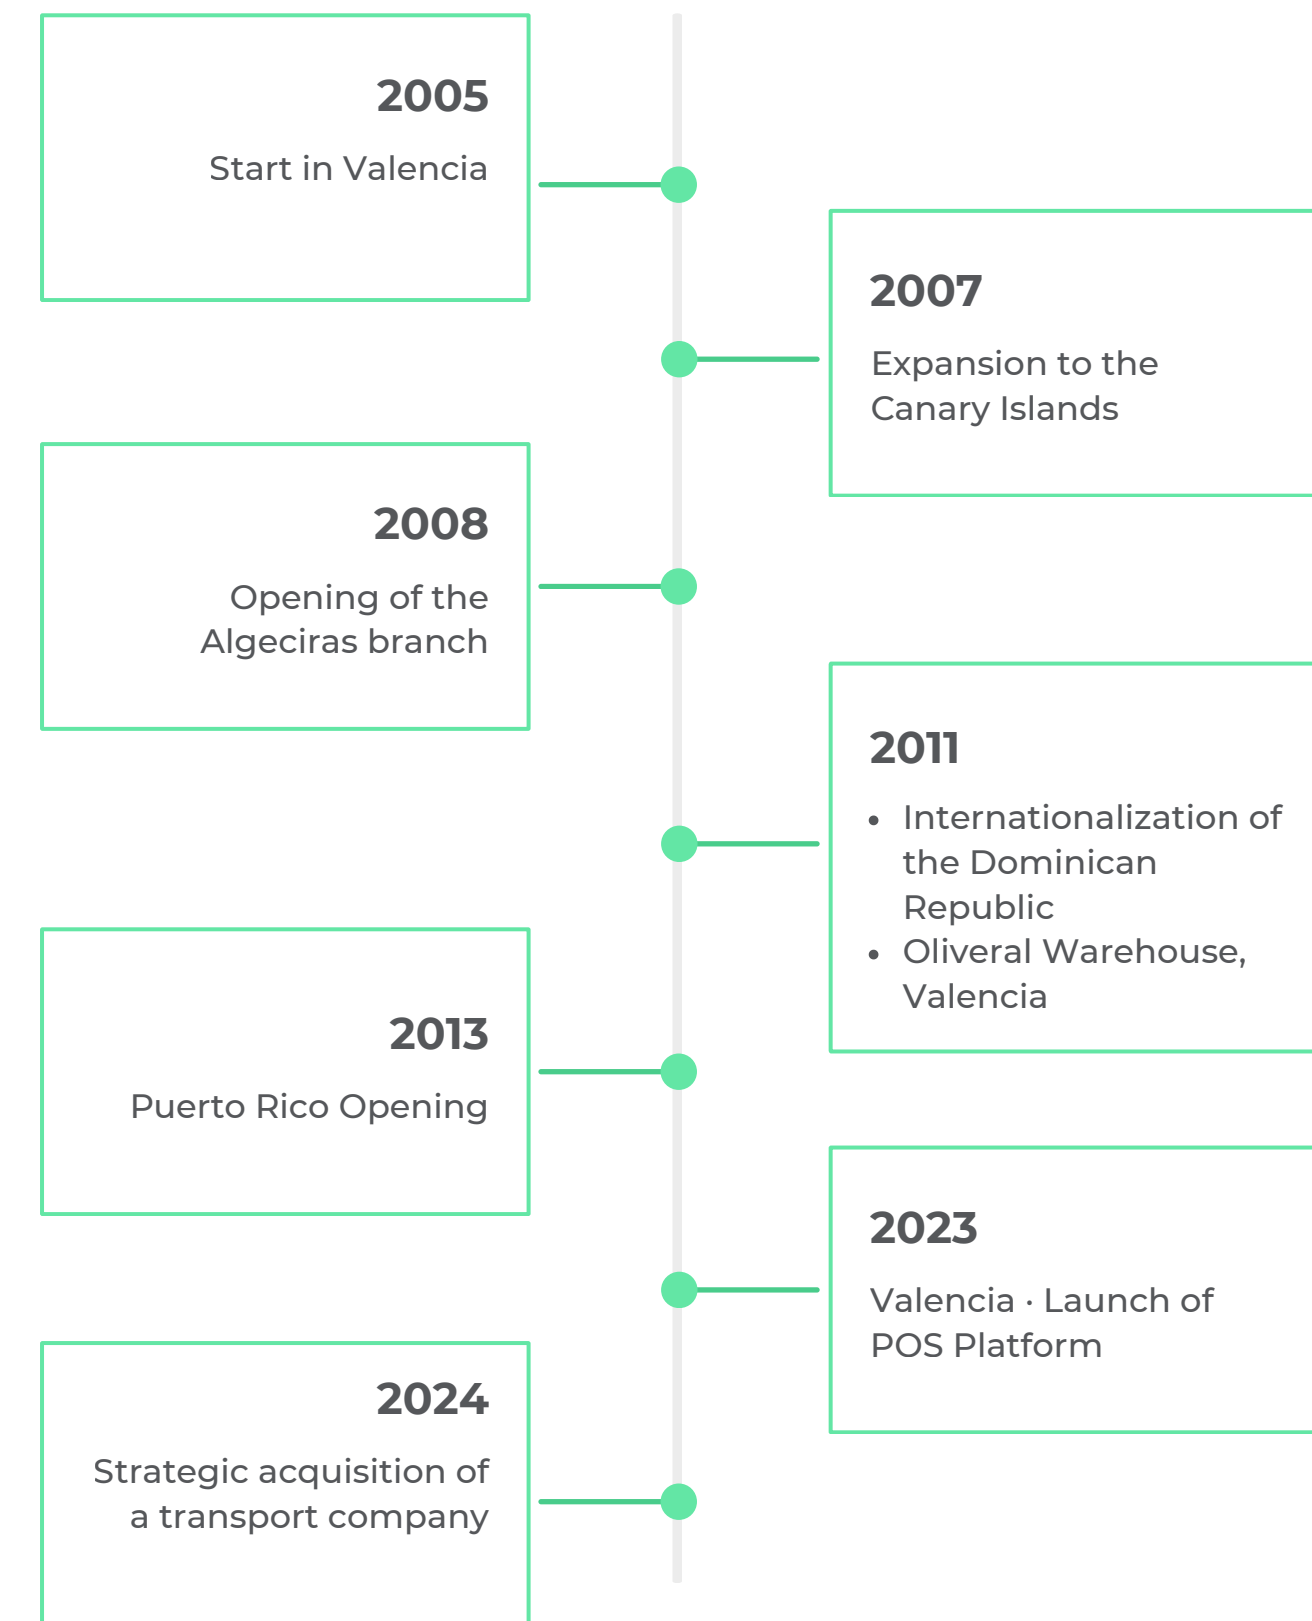

02 Our History

In Side Logistics was founded in Valencia in 2005 with a clear vision: to transform logistics into a strategic tool that directly impacts our clients' competitiveness.

Since then, we have grown and established ourselves in the sector without losing our DNA: putting innovation at the service of our clients and society.

Our evolution has been marked by key milestones such as expansion into the Canary Islands and Algeciras, internationalization in the Caribbean, and the incorporation of proprietary technology and intermodal solutions.

We are currently a multinational company acting as a nationwide logistics partner, prepared to anticipate and respond to current and future supply chain challenges.

03 Steering Committee

The team that guides our logistics evolution combines sector knowledge, global vision and results orientation.

04 Our Values

VALUES

Trust —

Long-term relationships based on transparency, accountability, and compliance.

Technology —

Lever to increase efficiency, control and real operational savings.

Cybersecurity —

We protect information and processes for secure logistics.

Excellence —

Continuous improvement with data, total control and results orientation.

Adaptability —

Flexible solutions for every customer, sector and operation.

Commitment -

With a focus on the environment and more sustainable logistics.

PURPOSE

Ready for your future

To propel our customers into the future through smarter, safer, and more efficient logistics.

05 Our Delegations

- Logistics infrastructure with more than 100,000 m² operational.
- Turnover ~€40M.
- **+56% growth in Valencia.**
- **+39% globally in 2024.**

06 Our Core Business

We integrate operations, technology, and management to transform the supply chain from start to finish.

07 Integrated solutions

A single partner capable of integrating, optimizing and scaling all logistics operations, from planning to execution and continuous improvement.

Logistics and technology consulting

Analysis, design and implementation of advanced operational solutions.

Storage and stock management

Infrastructure and efficient management of large-scale inventories.

National land transport

Nationwide operation with its own fleet of more than 250 vehicles.

Distribution and last mile

Efficient delivery tailored to each customer and market.

Customs and document management

Control and optimization of international customs operations.

08 Commitment to the Environment

We integrate sustainability into our operations. Our proprietary SaaS optimizes routes using advanced algorithms that consider traffic, weather, and demand, reducing CO₂ emissions and operating costs.

CERTIFICATIONS AND RECOGNITIONS

1K t

Fewer emissions per month

Facilities with energy self-consumption. First Valencian company to incorporate an electric truck into its operations.
